

NO IMPACT ON TYPICAL RESIDENTIAL CUSTOMER

Family of 4 on ¼ Acre

Average Monterey customer uses about 5200 gallons (7 units x 750 gallons/unit) per month

This typical family can use up to 11,400 gallons per month with no impact from increased rates in blocks 4 and 5

Example of ECU calculations:

Family of four	=	9 units
Quarter acre lot	=	1 unit
Total	=	10 units

10 units divided by 2 = allotment per block. So this family gets 5 units (x750 gallons = 3800 gallons) in each block:

Block 1	5 units (3800 gallons) at \$1.5264/unit	=	\$ 7.63
Block 2	5 units (3800 gallons) at \$3.0528/unit	=	\$15.26
Block 3	5 units (3800 gallons) at \$4.5792/unit	=	\$22.90
Totals	15 units (11,400 gallons)		\$45.79*

That usage and charges will be unchanged by the new rates proposed for Blocks 4 and 5

* THIS REPRESENTS ONLY THE NORMAL QUANTITY RATES AND DOES NOT INCLUDE THE MONTHLY METER CHARGE, THE MONTHLY QUANTITY SERVICE CHARGE, ELEVATION CHARGES OR ANY TAXES, SURCHARGES MPWMD, OR OTHER FEES, THAT REMAIN UNCHANGED
